

Dimensional stone Quarries – published and available on www.quarryforsale.com per October 2026

(we have around 100 **unpublished** confidential projects- pls enquire)

Detailed information on website !

USA NY Bluestone (Feldspar Sandstone) Quarry & Manufacturing Plant – US\$1.65M

The best New York Bluestone quarry, featuring real blue material. A well-established quarry and processing operation on 283 acres, specialising in dimensional stone and aggregate production. Assets include three tax lots, a fully equipped manufacturing site, active quarry land, undeveloped geological reserves and more than 16,000 sq ft across multiple buildings.

Canada-Ontario Premium Dimensional Granite Quarry – US\$1.99M

Prime 180-acre granite quarry and mineral reserve in Ignace, Ontario. The price includes land, mining rights and timber. Held by the same family since the late 1800s, the property is ready for immediate reactivation and includes black-and-white and pink/black-and-white stone varieties.

Spain Rose Sandstone Lumaquela Quarry – €590,000

Located near the Port of Valencia. The extraction area is 12,400 m² within 60 hectares leased from the town council. Designed annual production is 1,000 m³ of dimension stone. The quarry is dormant, with estimated reserves of 500,000 m³ / 1.25 million tonnes and a mining licence valid until 2029, extendable by 60 years.

Portugal 21-Hectare Active Granite Quarry – €690,000

Turnkey granite quarry and coastal-resilience supply asset in Northern Portugal. The fully operational, debt-free 21.18-hectare quarry has licences valid to 2063. It contains 550,000 m³ of white-grey monzogranite primary reserves and 135,000 m³ of pre-extracted material for crushing and aggregate sales.

Portugal 33-Hectare Active Granite Quarry – €590,000

Fully licensed, revenue-generating quarry producing grey, beige and yellow granite. The turnkey sale includes the experienced quarry team, production equipment, inventory and three years of financial and legal records. Reported 2024 production was 7,500 tonnes.

Spain-Barcelona Area Slate Quarry – €490,000

Active slate dimension-stone quarry less than 90 km from Barcelona. Its blue base colour with brown weathering is sought for building, cladding and landscaping across Spain, Andorra and France.

Ireland Hard Sandstone Quarry – €2.9M

Fully operational quarry on Ireland's west coast with all licences and permits secured. Annual production exceeds 30,000 tonnes. A zero-waste strategy produces blocks, wall stone, cobbles and flooring tiles, while smaller material is crushed for asphalt and concrete markets.

Spain Exceptional Marble Dimension Stone Quarry – €1.8M

The quarry produces four colours of marble and granite with strength, frost resistance and high-polish capability. The offer includes owner financing with a €700,000 down payment and the balance payable over three years.

India Premier Granite Dimension Stone Quarry – US\$1.4M

Active ten-hectare quarry on government-leased land with an extendable 20-year lease and extraction permit valid from 2019 to 2039. It is 10 km from a highway, 43 km from a rail goods platform and 126 km from a Hyderabad container terminal.

Turkey Exclusive Marble Dimension Stone Quarry – US\$990,000

Active licensed quarry in Muğla, around 80 km from a seaport. The site exceeds 100 hectares, holds more than 15 million m³ of reserves and offers over five marble colour variations.

India Granite Dimension Stone Quarry – US\$600,000

Four-hectare quarry on government-leased land with an extendable 20-year lease and an extraction permit valid from 2019 to 2039. It is 10 km from a highway, 43 km from a rail goods platform, 126 km from a Hyderabad container terminal and 390 km from Kakinada deep-water port.

Zambia Exclusive Blue Syenite Quarry – US\$2.19M

Dormant 190-hectare quarry with a four-hectare extraction area. Reported reserves include approximately 15,000 m³ of high-quality, marketable blue syenite blocks.

Zambia Exclusive Blue Gneiss-Sodalite Quarry – US\$3.9M

Dormant quarry covering 162 hectares, with a long-term agreement securing another 400 hectares. The current extraction area is one hectare and may be expanded without stated restriction.

South Africa Nero Impala & Impala Blue Quarry – US\$1.9M

Investment sought to reactivate a dormant but functional quarry and resume block extraction. All necessary licences and permits are stated to be in place for Nero Impala and Impala Blue stone.

Peru Travertine Dimension Stone Quarry – US\$1.19M

Active Andean travertine quarry in Yanacancha District, Chupaca Province, at 4,200–4,400 m elevation. The 123-hectare property has estimated reserves above 3.0 million m³ / 8.4 million tonnes of calcium carbonate and travertine and a permanent mining licence.

Brazil Bahia Granite Dimension Stone Deposit – US\$190,000

White granite with mafic mineral inclusions near Juazeiro, Bahia. The 999.76-hectare research-stage project has 13 rotary boreholes and an estimated 6,841,085 tonnes. No mining licence currently exists; the land is privately leased.

Uruguay Deep Black Gabbro Nero Assoluto Quarry – US\$1.0M

Operational 69-acre licensed black-gabbro quarry with seller financing. Its material is compared with Zimbabwean Nero Assoluto. Estimated life is 17 years, with capacity of 600 m³ per month / 7,200 m³ annually.

Mexico Prime Beige Marble Quarry – US\$7.9M

Established cream and beige marble quarry operation on 950 acres in Nueva Victoria, Coahuila. The property is near major transport routes and approximately 180 miles west of Monterrey.

Brazil Paraná Dolomite Deposit – US\$150,000 plus 11% royalties

Dolomite-marble opportunity near Curitiba on the border of Bocaiuva do Sul and Colombo. Research is complete and the final report is pending analysis. The 973.76-hectare project includes 16 documented core holes and an estimated 30,496,056 tonnes. No mining permit currently exists.

Argentina Porphyry Mining & Industrial Assets – US\$3.5M

Fully integrated turnkey operation in Patagonia, including real estate, active concessions, industrial infrastructure, machinery and inventory. Premium Patagonian porphyry, including blue porphyry, is used for hardscaping and architectural cladding. Assets include a 33-hectare Puerto Madryn hub and more than 1,570 hectares across six permitted quarry sites.

Aggregate Quarries – available on www.quarryforsale.com per October 2026

(we have around 100 **unpublished** confidential projects- pls enquire)

Detailed information on website !

USA Maine High-Grade Hardrock Aggregate Quarry – US\$1.25M

Fully permitted 109-acre quarry in Knox County, Maine. The transaction combines a US\$700,000 land purchase with a US\$550,000 performance royalty over ten years. The site contains more than 12 million tonnes of granite, granodiorite and gneiss, with permitted extraction and crushing operations.

USA Vermont Aggregate Quarry & Permitted Waste Facility – US\$2.95M

Established aggregate and environmental-services business with difficult-to-obtain Act 250 permits, a 20-year leasehold interest, 300,000 yards currently available and an expansion plan above 2 million yards. The 58-acre site also holds grandfathered solid-waste recycling rights.

USA Texas El Paso Hard Limestone Aggregate Quarry – US\$2.5M

Dormant 640-acre limestone quarry in Hudspeth County, in the El Paso region. Approximately 11 million tonnes are reported as immediately extractable, with technical reports indicating compliance with TxDOT Item 247 Grade 3 standards.

USA New Mexico Perlite Deposit – US\$990,000

Perlite opportunity near Silver City covering 89 BLM mineral deposits over more than 1,900 acres. A 1989 geological report states 67.6 million tonnes of proven reserves, with potential up to 200 million tonnes after further exploration.

USA New York Bluestone Quarry & Manufacturing Plant – US\$1.65M

Operational 283-acre quarry and processing business producing bluestone / feldspar sandstone for dimension stone and aggregate markets. The property includes manufacturing facilities, active quarry land and undeveloped reserves.

USA California High-Quality Dolomite Deposit – US\$1.9M

Fully permitted 240-acre deposit in San Bernardino County, California, containing an estimated 40–60 million tonnes of premium dolomite. Potential uses include cement-clinker substitution, glass, rubber, coatings, plastics, agriculture and forestry.

USA California Pumice-Pozzolan & Bentonite Clay Deposit – US\$1.4M

Dormant 288-acre property with an active 18-acre permit area and licences valid to 2040. The deposit contains approximately 8 million tonnes of seismotite and

calcium bentonite clay and is described as one of only two comparable deposits in North America.

USA California Calspar Albite / Feldspar Deposit – US\$1.2M

Dormant but fully permitted 148-acre fee-simple mine with an established production history. Proven and measured reserves are estimated at 10–15 million tonnes of high-purity, ceramic-grade albite feldspar.

USA Kentucky Metallurgical Coal Mine – US\$1.5M

Inactive permitted mine in Floyd County, eastern Kentucky, with approximately 466,000 in-place tonnes. An adjacent property reportedly contains about 1.7 million additional tonnes. The coal has less than 1% sulphur, about 13,000 BTU and 33% volatile matter.

USA – Nevada/California: Six Gold Claims – 16 Million Ounces on 4,300 Acres – US\$370M

The Asset. In a market starved for proven reserves, a portfolio of six strategic gold mines in California and Nevada is presented. Spanning more than 4,300 acres, the collection is stated to hold a verified resource of 16,047,824 ounces of gold.

The Security of NI 43-101. The portfolio is backed by National Instrument 43-101 reports: signed and stamped by independent Qualified Persons; classified using recognised Measured, Indicated and Inferred categories; and intended to provide geological certainty for financing and development.

The Value Proposition. The stated gross metal valuation exceeds US\$66 billion. The listing notes the distinction between in-situ gold and refined bullion and refers to CAPEX, OPEX, time value of money and regional considerations...

USA – Nevada: Recently Operating Gold Mine, 660 Acres – US\$30M

Prime Mining Property close to Lovelock, Nevada.

Overview. Located in a mining-friendly Nevada county, this property offers both underground hard-rock and surface placer-mining operations.

Permits & Reclamation. The site is fully permitted with an existing reclamation bond covering 660 acres. It comprises 25 unpatented lode claims and eight unpatented placer claims.

Operational Status. This is described as a turnkey mine that produced gold until September 2024.

Resource Estimate. ...

USA – Arizona: Dormant Gold, Silver and Metals Mine, 50 Acres – US\$2.5M

Arizona Gold, Silver and Metals Mine for Sale. Located in La Paz County, Arizona, near Vicksburg.

Property Details. The property comprises three patented mining claims: one placer claim and two lode claims. It covers 50 acres, includes two on-site water wells and has existing infrastructure including shafts, adits and open cuts.

Mining History. The mine operated until 1950. Approximately 30,000 tonnes of ore piles are stated to remain, with an estimated value exceeding US\$38 million...

Canada Ontario Granite Aggregate & Decorative Stone Quarry – US\$990,000

Permitted operational quarry around 150 km from Toronto. The offering covers 1.67 licensed hectares plus approximately 190 acres under Crown claim and produces grey/pink granite, landscape rock, Muskoka flagstone, gneiss, armour stone and crushed aggregate.

Canada British Columbia Zeolite Resource – US\$2.10M

Three mineral titles covering 527.17 hectares in the Similkameen Mining District near the US border. A 2018 report estimated 46.5 million tonnes of historical resources, including measured, indicated and inferred material.

Canada Ontario Premium Aggregate Granite Quarry – US\$1.99M

Prime 180-acre patented property near Ignace, Ontario, including land, mining rights and timber. The quarry offers dimension stone and industrial aggregate, plus rail siding, Trans-Canada Highway access and existing power and water connections.

Argentina Patagonia Porphyry Mining & Processing Operation – US\$3.5M

Fully integrated turnkey operation in Patagonia with real estate, active concessions, industrial infrastructure, machinery and inventory. Premium porphyry, including blue porphyry, is used for hardscaping and architectural cladding. Assets include six permitted quarry sites over 1,570 hectares and a 33-hectare Puerto Madryn logistics hub.

Peru Calcium Carbonate Aggregate Quarry – US\$1.19M

Active 123-hectare quarry in Yanacancha District, Chupaca Province, at an elevation of 4,200–4,400 m. Estimated reserves exceed 3.0 million m³ / 8.4 million tonnes of calcium carbonate and travertine, supported by a permanent mining licence.

Bahia Granite Aggregate Deposit – US\$150,000

Research-stage white-granite project near Juazeiro, Bahia, covering 999.76 hectares. Thirteen rotary boreholes were completed and the deposit is estimated at 6,841,085 tonnes. No mining licence currently exists; the land is privately leased.

Portugal Granite Quarry – Triple Revenue Hub – €690,000

Fully operational, debt-free 21.18-hectare quarry in Northern Portugal with licences valid to 2063. Primary reserves are stated at 550,000 m³ of white-grey monzogranite, plus 135,000 m³ of pre-extracted material available for crushing and aggregate sales.

Spain Dolomite Mine & Aggregate/Micronisation Plant – €3.5M

Turnkey Greater Madrid operation and the region's only active dolomite production asset. It combines construction-aggregate output with micronised industrial-mineral production and reports more than 10 million tonnes of inferred dolomite and dolomitic-limestone resources.

Andalusia High-Purity Silica Sand Mine – €6.9M

Active 60-hectare silica-sand operation with approved mining and environmental rights. Identified resources total 66.5 million tonnes, including 19.4 million tonnes of proved and probable reserves. Purity exceeds 99% SiO₂ after washing.

Croatia High-Purity Limestone Deposit – €2.49M

Turnkey Adriatic-region mining asset originally developed for dimension stone and validated for industrial limestone and infrastructure aggregates. The deposit is reported at approximately 5 million tonnes, with 95.12–99.05% carbonate purity and favourable rail-to-port logistics.

Bosnia Strategic Cement Plant & Mineral Infrastructure Hub – €9.9M

Ready-to-permit greenfield project north of Sarajevo based on ultra-pure limestone and adjacent quartz sand. The resource base is presented as sufficient for a 3,000-tonne-per-day clinker line for more than a century, with silica content reported at 98.3%.

Bosnia & Herzegovina Black Limestone Aggregate Quarry – €1.5M

Actively producing licensed quarry on ten hectares, with output around 700 m³ per day and approximately 7 million m³ of additional reserves. The sale includes weighing, power, water and supporting infrastructure, with expansion potential to 50 hectares.

Bosnia & Herzegovina Active Beige Limestone Quarry – €1.2M

Seven-hectare quarry currently inactive but presented as readily restartable. Approximately 3 million m³ are available for extraction, with potential expansion to 50 hectares and access to as much as 50 million m³ of resource.

Ireland West Coast Hard Sandstone Quarry – €2.9M

Fully operational quarry with all licences and permits secured. Annual production exceeds 30,000 tonnes. Its zero-waste model produces blocks, wall stone, cobbles and flooring tiles, while smaller material is crushed for asphalt and concrete markets.

Ireland West Coast Granite Aggregate / Dimension Stone Quarry – For Lease

Fully operational granite quarry offered through a hybrid take-or-pay structure combining a substantial one-time security payment of approximately €700,000–€900,000, a fixed ground lease and performance-based mineral payments.

Poland High-Quality Limestone Aggregate Quarry – €4.9M

Dormant eastern Poland quarry containing limestone with reported CaCO₃ content of 97.69%. Confirmed drilling indicates approximately 4.65 million tonnes to 25 m depth within a 9.3-hectare mining-licence area.

Romania Dolomitic Limestone Aggregate Quarry – €5.95M

Fully operational quarry in western Romania with fixed and mobile crushing plants. Fixed-plant capacity is stated at 80-100 tonnes per hour and mobile crushing at approximately 100 tonnes per hour. Reserves are approximately 13.49 million tonnes across 41.19 hectares.

Zambia Virgin Nepheline Syenite Reserve – US\$2.9M

Dormant quarry operation covering 190 hectares, with a small-scale mining permit and required licences in place. Estimated nepheline reserves are around 10 million tonnes; the licence also covers white, pinkish and greyish syenite.

Tanzania Granite / Limestone Aggregate Quarry – US\$495,000

Sixty-acre quarry property offering granite and limestone, with stated potential for gold, sulphur, barium, iron ore and titanium oxide. The listing highlights proximity to other mining operations and related logistics advantages.

Tanzania Gold Project – US\$3.1M

Mineral Resource Estimate.

Significant Resource. The report estimates gold resources across multiple deposits totalling 24.1 million tonnes of measured and indicated resources at a 0.5 g/t cut-off grade, representing 1,020,000 ounces of gold. Inferred resources add another 250,000 ounces. This is described as a substantial increase from a previous estimate.

Grade and Tonnage. The report details grade and tonnage for each deposit at various cut-off grades, allowing different economic scenarios to be modelled.

Open at Depth. Several deposits show potential for additional resource expansion through deeper drilling, particularly in three areas.

Metallurgical Testing – Gravity Recovery. Gravity-separation tests indicate good gold-recovery potential of 35-36% for the main test sample...

North Africa High-Purity Gypsum Mining Asset – US\$9.9M

Ready-for-development operation with an 800-hectare, 30-year exploitation concession and more than 400 hectares of privately owned industrial land. Gypsum purity is reported at 96-97%, with 440.5 million tonnes proven and total geological potential above 1.1 billion tonnes.

Australia NSW Hard Rock Aggregate Quarry – AUD\$3.9M / approximately US\$2.7M

Active Mid North Coast quarry between Coffs Harbour and Grafton, operated for more than 70 years. It produces quartzofeldspathic conglomerate, basalt and argillite and is positioned to serve major regional infrastructure projects.

Decommissioned Quarries – available on www.quarryforsale.com per October 2026

(we have around 100 **unpublished** confidential projects- pls enquire)

Detailed information on website !

Italy: Quarry Nature Retreat with Vineyard, Forest & Panoramic Lake Garda Views – €295,000

A property combining a historic quarry, vineyard, forest and panoramic Lake Garda views, proposed for sustainable and nature-oriented concepts.

Key Facts. Total land area is approximately 120,000 m²: around 90,000 m² of forest, 26,000 m² of mountain meadow and 4,000 m² of vineyard. The terrain has a slight-to-medium slope of about 25%, lies around 600 m above sea level and includes Pinot Noir / Pinot Nero and Pinot Gris / Pinot Grigio vines.

Historic Marble Quarry. The disused quarry provides a distinctive landscape feature that could potentially serve as a natural amphitheatre, terrace backdrop or integrated architectural element.

Zoning and Protection. The property is designated agricultural land within the Monte Baldo protected area. An agricultural building may generally be possible, subject to approval; changes of use, terrain alterations and all development possibilities require advance verification with the responsible municipality.

Illustrative Concepts, subject to approval. Eco-retreat, modern country estate or barn architecture, and a wine lodge focused on tastings and Lake Garda views.

Italy: Decommissioned Marble Quarry in the Verona Mountains – €250,000

A rare opportunity to acquire a 20,000 m² land asset in Northern Italy, combining geological history with a mountain real-estate location.

Location. Approximately 1,100 m above sea level in the Verona Mountains.

Environment and Condition. Situated in a natural protection zone. The marble quarry is decommissioned, and its yellow/red marble deposits are exhausted.

Potential Utilisation. Presented as suitable for a private back-to-nature estate or sustainable tourism project using non-concrete materials, subject to applicable approvals.

Acquisition Terms. Offered at €250,000 on a first-come, first-served basis.

Interested parties are asked to sign a non-disclosure agreement and acknowledge a 5.9% buyer's commission.

Spain: 180-Hectare Land Opportunity in Almeria – €395,000

Prime 180-hectare investment property that has never been mined. It comprises 130 hectares in Rambla del Salvador and 50 hectares in Los Nudos. Former quarry licences exist, but the land remains untouched and unexcavated.

Price. Approximately €0.22 per m², or €395,000 in total.
